

1. Out of 100, what percentage of the project do you think you contributed to?

30%

2. Describe your individual contribution to the project.

For this project I got involved in the research of the topic during the first weeks of development. I had the chance to get into the Ticketing System, trying to design the architecture of the algorithm. Moreover I have helped my colleagues develop their part, unluckily I had some difficulties with Brownie but we managed to get over it together. Finally, I got into the State of the Art and my part of the project memory, to end up, I gathered and built the full video to describe the topics done in the project.
